

ICSR Case Intake and Validation

Case ID: ICSR-TRAIN-001

Fictional, de-identified training case. Not a real patient safety report.

Section	Field	Value	Status
Administrative	Case ID	ICSR-TRAIN-001	Reported fact
Administrative	Country of primary source	India	Reported/assigned training field
Patient	Patient characteristics	54-year-old male; initials not provided	Reported fact
Reporter	Primary source	Dr. R.K.; physician; contact details not provided	Reported fact
Product	Suspect medicinal product	Amoxicillin 500 mg capsule	Reported fact
Product	Indication	Acute bacterial respiratory infection	Reported fact
Product	Dose/regimen	500 mg orally three times daily	Reported fact
Product	Therapy start	2026-08-10	Reported fact
Reaction/Event	Adverse event	Generalized maculopapular rash with facial swelling	Reported fact
Reaction/Event	Event onset	2026-08-12	Reported fact
Reaction/Event	Seriousness	Non-serious based on the information available	Assessment from supplied training narrative
Outcome	Action taken	Amoxicillin discontinued; symptomatic treatment given	Reported fact
Outcome	Outcome	Recovering at last observation	Reported fact
Causality-related	Dechallenge	Positive (reported improvement after discontinuation)	Reported fact
Causality-related	Rechallenge	Not reported	Missing information
Concomitant therapy	Concomitant medicines	Not reported	Missing information
Investigations	Relevant tests	No relevant test results reported	Missing information

Chronology

ICSR CASE CHRONOLOGY

2026-08-10 — Amoxicillin 500 mg orally three times daily started for acute bacterial respiratory infection.

2026-08-12 — Generalized maculopapular rash with facial swelling reported.

2026-08-12 — Amoxicillin discontinued; symptomatic treatment given.

After discontinuation — Improvement reported; patient recovering at last observation.

Rechallenge — Not reported.

Completeness Checklist

Case ID: ICSR-TRAIN-001

MINIMUM CASE ELEMENTS

☒ Identifiable patient: 54-year-old male

☒ Identifiable reporter: Dr. R.K., physician

☒ Suspect medicinal product: Amoxicillin 500 mg capsule

☒ Adverse event: Generalized maculopapular rash with facial swelling

CASE QUALITY

☒ De-identified information used

☒ Product and dose documented

☒ Therapy start date documented

☒ Event onset date documented

☒ Action taken documented

☒ Outcome documented

☒ Dechallenge documented

☐ Rechallenge — not reported

☐ Concomitant medicines — not reported

☐ Relevant tests — not reported

☐ Reporter contact details — not provided

FACT VS ASSUMPTION

Reported facts are marked as facts in the structured report.

No unreported diagnosis, laboratory result, concomitant medicine, or rechallenge was invented.

VALIDATION RESULT

Core minimum elements are present for a training ICSR.

Follow-up is required for missing/relevant information before treating the case as fully complete.
